President's Welcome Note

Dear Conference Participants,

Welcome to the 11th Annual Conference of the Social Sciences (CSS)! Since the inaugural conference in 2005, the Florida Society of the Social Sciences (F3S) has been proud to offer a collegiate and cooperative forum in which graduate and undergraduate students can showcase their research as they prepare for future careers in academia, research, and the professional world. We are pleased to host YOU as presenters, speakers, and participants at this year's CSS!

Every year, F3S brings regarded scholars from a variety of disciplines to serve as keynote speakers, and this year we have the highest honor of hosting Dr. Patricia Hill Collins, Distinguished Professor at the University of Maryland and Charles Phelps Taft Emeritus Professor of Sociology at the University of Cincinnati. Dr. Patricia Hill Collins's work permeates the reading lists for courses across the globe in a variety of fields, from sociology to law, and her contributions to theory and social justice are sure to continue to impact academic discourse for many years to come. We hope you will join us as we welcome her this morning with the sincerest of Floridian warmth.

Since our inaugural year, the CSS has grown to accommodate more students, disciplines, and schools, and, true to form, this year is our most impactful yet! We are proud to include emerging researchers from 11 different institutions across the state and country. Based on this expansive presence alone, I feel we have already lived up to our conference theme, *Pushing Boundaries: Extending Reach and Amplifying Voice in Social Science Research*.

This year's theme emphasizes expansion, extending the range of student impact and connectivity in the world of social science. Our conference aims to help students push further, to expose presenters and attendees alike to the potential power of their work in academic and non-academic domains. In addition to our research presentation sessions, we are excited to offer participants access to a variety of workshops, including sessions on manuscript publishing, grant writing, and communicating research to drive social change. We hope that you will find merit in this variety of exciting opportunities and discover a strengthened network and new scholarly proficiencies by the conference's closing ceremony. Let's push the boundaries, exceed expectation, and begin to shape the future of social science research. We can, and we *will*, use this impetus to change not only our fields, but also the world to better suit the needs of new generations.

We are thrilled to host you at the University of Florida for our 11th year. We extend our sincerest gratitude to our co-sponsors, speakers, presenters, and participants for their ongoing interest and support. With the consistent propulsion of our team and supporters, I can only imagine great things for F3S and the CSS for many years to come!

Warmly,

Heather Covington, *President*
The Florida Society of the Social Sciences

Keynote Address

Dr. Patricia Hill Collins
University of Maryland, College Park

Patricia Hill Collins is Distinguished University Professor of Sociology at the University of Maryland, College Park and Charles Phelps Taft Emeritus Professor of Sociology within the Department of Africana Studies at the University of Cincinnati. Her award-winning books include *Black Feminist Thought: Knowledge, Consciousness, and the Politics of Empowerment* (1990, 2000) which received both the Jessie Bernard Award of the American Sociological Association (ASA) and the C. Wright Mills Award of the Society for the Study of Social Problems; and *Black Sexual Politics: African Americans, Gender, and the New Racism* (2004) which received ASA's 2007 Distinguished Publication Award. She is also author of *Fighting Words: Black Women and the Search for Justice* (1998); *From Black Power to Hip Hop: Racism, Nationalism, and Feminism* (2005); *Another Kind of Public Education: Race, Schools, the Media, and Democratic Possibilities* (2009); *The Handbook of Race and Ethnic Studies* (2010) edited with John Solomos; and *On Intellectual Activism* (2013). Her anthology *Race, Class, and Gender: An Anthology, 9th edition* (2015), edited with Margaret Andersen, is widely used in undergraduate classrooms in over 200 colleges and universities. Professor Collins has taught at several institutions, held editorial positions with professional journals, lectured widely in the United States and internationally, served in many capacities in professional organizations, and has acted as consultant for a number of community organizations. In 2008, she became the 100th President of the American Sociological Association, the first African American woman elected to this position in the organization's 104-year history. Her latest book, *Intersectionality*, co-authored with Sirma Bilge, will be published in 2016 as part of Polity Press's Key Concepts Series.

Teaching Roundtable

The Aggregate
Sociology Graduate Student Organization

This roundtable will be an informal discussion meant to promote dialogue among all those in attendance. We invite graduate student teachers and teaching assistants to discuss their experiences and share stories, strategies and teaching resources. We further invite inexperienced and upcoming teachers to ask questions and share their concerns. We hope that in hosting this roundtable, we can foster an environment for growth and peer-mentorship, as well as provide support for all our graduate student teachers as they develop and refine their approaches to the classroom environment and to the students they guide.

Communicating Your Research to Drive Change

Presenters: Annie Neimand and Lauren Griffin

Workshop hosts, Annie and Lauren, are graduate students and important actors in the *frank* gathering hosted annually by the University of Florida's Department of Journalism. *frank* is described as a "a community of movement builders and changemakers who use strategic communications to drive positive social, institutional and behavioral change" (<http://frank.jou.ufl.edu/what-is-frank/>). This workshop mimics the *frank* mission by equipping student researchers with the communication skills necessary to put their work to use. Join workshop organizers as they discuss the science behind science communication, how to tell stories about research, and how to use these skills to drive change.

The Lack of Relevancy in Social Science and What to Do About It

Social Science Works

In 2002, political scientist Ian Shapiro published an article in which he criticized the practices of the social sciences as method- and theory-driven instead of focusing on actual social problems. This criticism has been shared and rearticulated by many other critics since then (Lawrence & Skopcol 2006, Scott 2007, Burawoy 2005 and others). The missing relevancy of social science's research for civil society caused the American Sociological Association to set up a Task Force in 2005 to tackle this problem ([ASA 2005](#)). The problem though, has not been solved within the last 10 years, even though there are developments towards a more meaningful research (e.g. Nyden et al. 2012, Flyvbjerg et al. 2012). In this presentation, I depict recent developments in the social sciences and analyse the causes of the relevancy decline. This decline resulted from the attempt to imitate the 'hard sciences' in its methods, and by that sacrificing a value-informed and problem-driven approach towards social research. The prestige-focus in academia often furthers the malevolent trend of irrelevancy. As long as high numbers of publications are considered an indicator of success, the incentive to 'publish for the sake of publishing' will pertain. In the end, I suggest some "ways out" and provide promising examples. Phronetic research (Flyvbjerg 2001, 2012), Public Sociology (Gans 2002) and a rising number of academic bloggers provide good examples on how to tackle the disciplinary problems. The main argument presented in the talk can be found in the [academic position paper of Social Science Works](#).

Workshop Session H

R Statistical Software

The Syndicate

Criminology Graduate Student Organization

Venue: 2334 Turlington Hall

3:00 pm – 4:00 pm

This workshop will provide attendees with a taste of the data analysis tools R has to offer, covering basic data manipulation and analysis commands. Whilst this workshop will not be able to train attendees in the increasingly vast R coding language, by the end of the session you should be able to write a script that will set your working directory, open a dataset, browse the data, subset the data by respondent and variable, drop missing data, produce crosstabs and histograms, and run regressions. Provided there is enough time to do so, some of the more complex codes that can be used for data scraping and geocoding will be showcased to demonstrate the versatility that makes R a valuable tool.
